## Storage Conditions

Container	Storage Temperature	Storage conditions to achieve maximum shelf life
Multiwall Bag, Bulk Bag, Bulk	< 25 °C	Optimum storage conditions for KRYSTAR are 25°C (77°F) or lower, and less than 50% relative humidity. Crystalline fructose begins to absorb moisture at 56% relative humidity and room temperature. Unopened bags are designed to protect KRYSTAR under optimum warehouse conditions up to 18 months. Crystalline Fructose is a very stable molecule however temperature and humidity should be controlled to avoid potential lumping. These lumps are usually pliable and are easily broken by massaging the bags prior to opening or passing the crystalline fructose thru de-lumping machinery. For further information please reference the Tate & Lyle "Krystar Crystalline Fructose Storage and Handling" technical bulletin.

## Shelf Life

Package	Shelf Life	Sulfur Dioxide and Sulfite Level
Multiwall Bag, Bulk Bag, Bulk	540 Days	< 10 ppm

## Organic Statement

Certified for Organic Labeling: No
